

## Instructions for use of Genesis program.

The progress of each participant is monitored by DTI. If you are working towards a Certificate of Achievement, each quiz in each of the 7 modules must be successfully completed. Once you are done, contact DTI at [genesis@dtiatlanta.com](mailto:genesis@dtiatlanta.com). DTI will verify requirements and mail you a certificate.

The image shows a screenshot of a web browser displaying the Genesis program interface. The browser window title is "Module One - Intro to SMS - Google Chrome". The URL is [dti.articulate-online.com/p/5493164223/DocumentViewRouter.ashx?Cust=54931&DocumentID=eff73919-3893-4efa-bf49-8563450e0a83&Popped=True&InitialPage...html](http://dti.articulate-online.com/p/5493164223/DocumentViewRouter.ashx?Cust=54931&DocumentID=eff73919-3893-4efa-bf49-8563450e0a83&Popped=True&InitialPage...html). The interface includes a "Notes" panel on the left, a main content area with a video player, and a control bar at the bottom.

**A** points to the browser window title bar.

**B** points to the "Notes" panel on the left, which contains the following text:

1. What is a Safety Management System?  
01:30

Hello, I'm Dennis Taboada. I'm the President of DTI Training Corporation here in Atlanta. I just wanted to welcome you to the Genesis Program. This is the introduction and overview of implementing a safety management system in your company. This program is going to take a look at the pillars, the components, the elements, and expectations of a safety management system. In subsequent lessons, we'll be delving into the specifics, rolling up our sleeves, if you will to actually give you hands on experience and tools that will aid you in implementing this system. A lot of people think it's very difficult, but it really is not if you think about what is necessary. I'm willing to bet that over 80 percent of what is needed to implement a safety management system is already being done by your company. You just need to put it in the right format and act upon what we are going to discuss in this lesson. First, let's take a look at what is a safety management system.

The main content area displays the title "What is a Safety Management System?" and "Genesis" above a video player showing Mr. Dennis Taboada, CEO, President DTI Training Corporation Inc.

**C** points to the "SLIDE 1 OF 27" indicator in the control bar.

**D** points to the "PAUSED" indicator in the control bar.

## The Screen Controls

- A. The Attachments tab is the first place you should go. Here you will find the Module's Workbook and other important documents needed for the lesson. DTI recommends printing out all documents and creating a binder. The workbook has room for notes. Also here you will find relevant hyper-links to related material that will help in your understanding of the lesson.
- B. This area holds a transcript of the video or audio that is on the slide. It is helpful to some as they review the slides content. It is also designed to aid the hearing impaired.
- C. The main controls include a start and stop feature on the large button and a next-slide, previous-slide control on the buttons to the right.
- D. This control will give you up to three options of viewing the current slide.

As questions arise or if you need further clarification on a topic, you are free to contact DTI @ [genesis@dtiatlanta.com](mailto:genesis@dtiatlanta.com) or call 1-866-870-5490. A DTI subject matter expert will answer you as soon as possible. This service continues for the duration of your Genesis enrollment.
